

LAZAR MANUFACTURED PARTS FOR RESINA® CAPPERS

PRODUCT LINE-UP

Change Parts

Cap Sorters

Depending on cap style, there are different types of cap sorting change parts, Lazar carries all the cap sorting insert rings, division dials, pin dials and pin rings for all the Resina® cappers. All you need to do to get started is send us cap samples and give us a call.

Chute Parts

Stainless Steel Cap Chute-Ends for all your Resina® Capping Systems.

Chucks

Down Pressure and Air Chucks for Resina® Cappers model:

- S20-30-36-40-41-51
- SN-30-36-41-51
- NRS-30-36-41-51

We have most parts in stock ready to ship the same day. Common parts are Grip Rings, Grip Plugs, Rocker Arms, Chuck Body, Cap Back-up, Grip Fingers, and complete chuck assemblies.

Timers & Holders

Bottle Timer and Holder assemblies for all the Resina® Single Chuck Cappers. Standard material is stainless steel with no extra charge. Just send in your bottle/caps, machine model, and serial number. Most deliveries are one week from order, guaranteed to work or 100% of your money is refunded.

Replacement Parts

Quills

Quill assemblies for all Resina® inline model cappers. This can include cap tightening discs, quill flanges, universal drives, quill clutches and clutch parts, over-head pedal assemblies, quill drive shafts and many more. Most items in stock. Call for pricing and delivery.

Gripper & Conveyor

The Gripper Chain is used to grip bottles on inline cappers. Either in C.R.S. or S.S. and can have different shaped rubber blocks for different bottles. Lazar also has a conversion kit that will transform your capper's gripper system from chain to belt. Call or visit our website for more information.

Bearings

All you need is the Resina® part number and we will supply the correct bearing for your system. If you do not have a part number, call us and we can walk you through it.

Replacement Belts & Rubbers

Quill Rubbers

Quill Rubbers come in many different sizes and durometers. If you need replacement rubbers or suggestions on which rubber is best for your application, feel free to call us.

Gripper Belts

Gripper Belts are used on the new style Resina® cappers. They can be made in different materials, sizes, and shapes depending on your application.

Gripper Blocks

Lazar carries and manufactures a wide selection of gripper rubber blocks with varying durometers. The type, size, and shape of the gripper rubber blocks are dependent upon the container, jar or bottle. The rubber composition depends on the product filled. We carry blocks made of Polyurethane, Gum Rubber, Vinyl and many other compositions. Call for a free consultation.

Why Choose Lazar Service and Parts for your Resina® Capper?

We offer rush delivery of your parts to decrease your machine down-time.

We have former Resina® employees with extensive knowledge of your capping machine.

We will service and provide customer phone support for your capping machine.

NEW Gripper Conversion Kit

The Gripper Conversion Kit changes the standard gripper chain to the new gripper belt system. If you have an old Resina® capper that has a gripper chain, this is a cost effective solution. The belt can be either single or double and have different sizes.

NEW Air Clutches Conversion Kit

The Air Clutch system is available for your existing Resina® Capper. "On the fly torque adjustment", no need to stop the machine, remove the clutch and adjust the clutch by hand. This system is adjusted using a simple up-down button. For additional accurate torque control, an HMI and servo torque control can be added to enhance your cap application torque.

NEW Servo Motor Torque Kit

Servo Motor Torque Control Kit for Resina® models:
U30/40, UN 30/40 & NRC 30/40
